

## CONNECTAB SERIES TABLET 16

WWW.QUICKLERT.COM

### Installation and Setup

#### Step 1

Install the bracket securely onto the wall, employing the designated template located on the reverse side of this sheet (100x100 VESA mounting standard).

#### Step 2

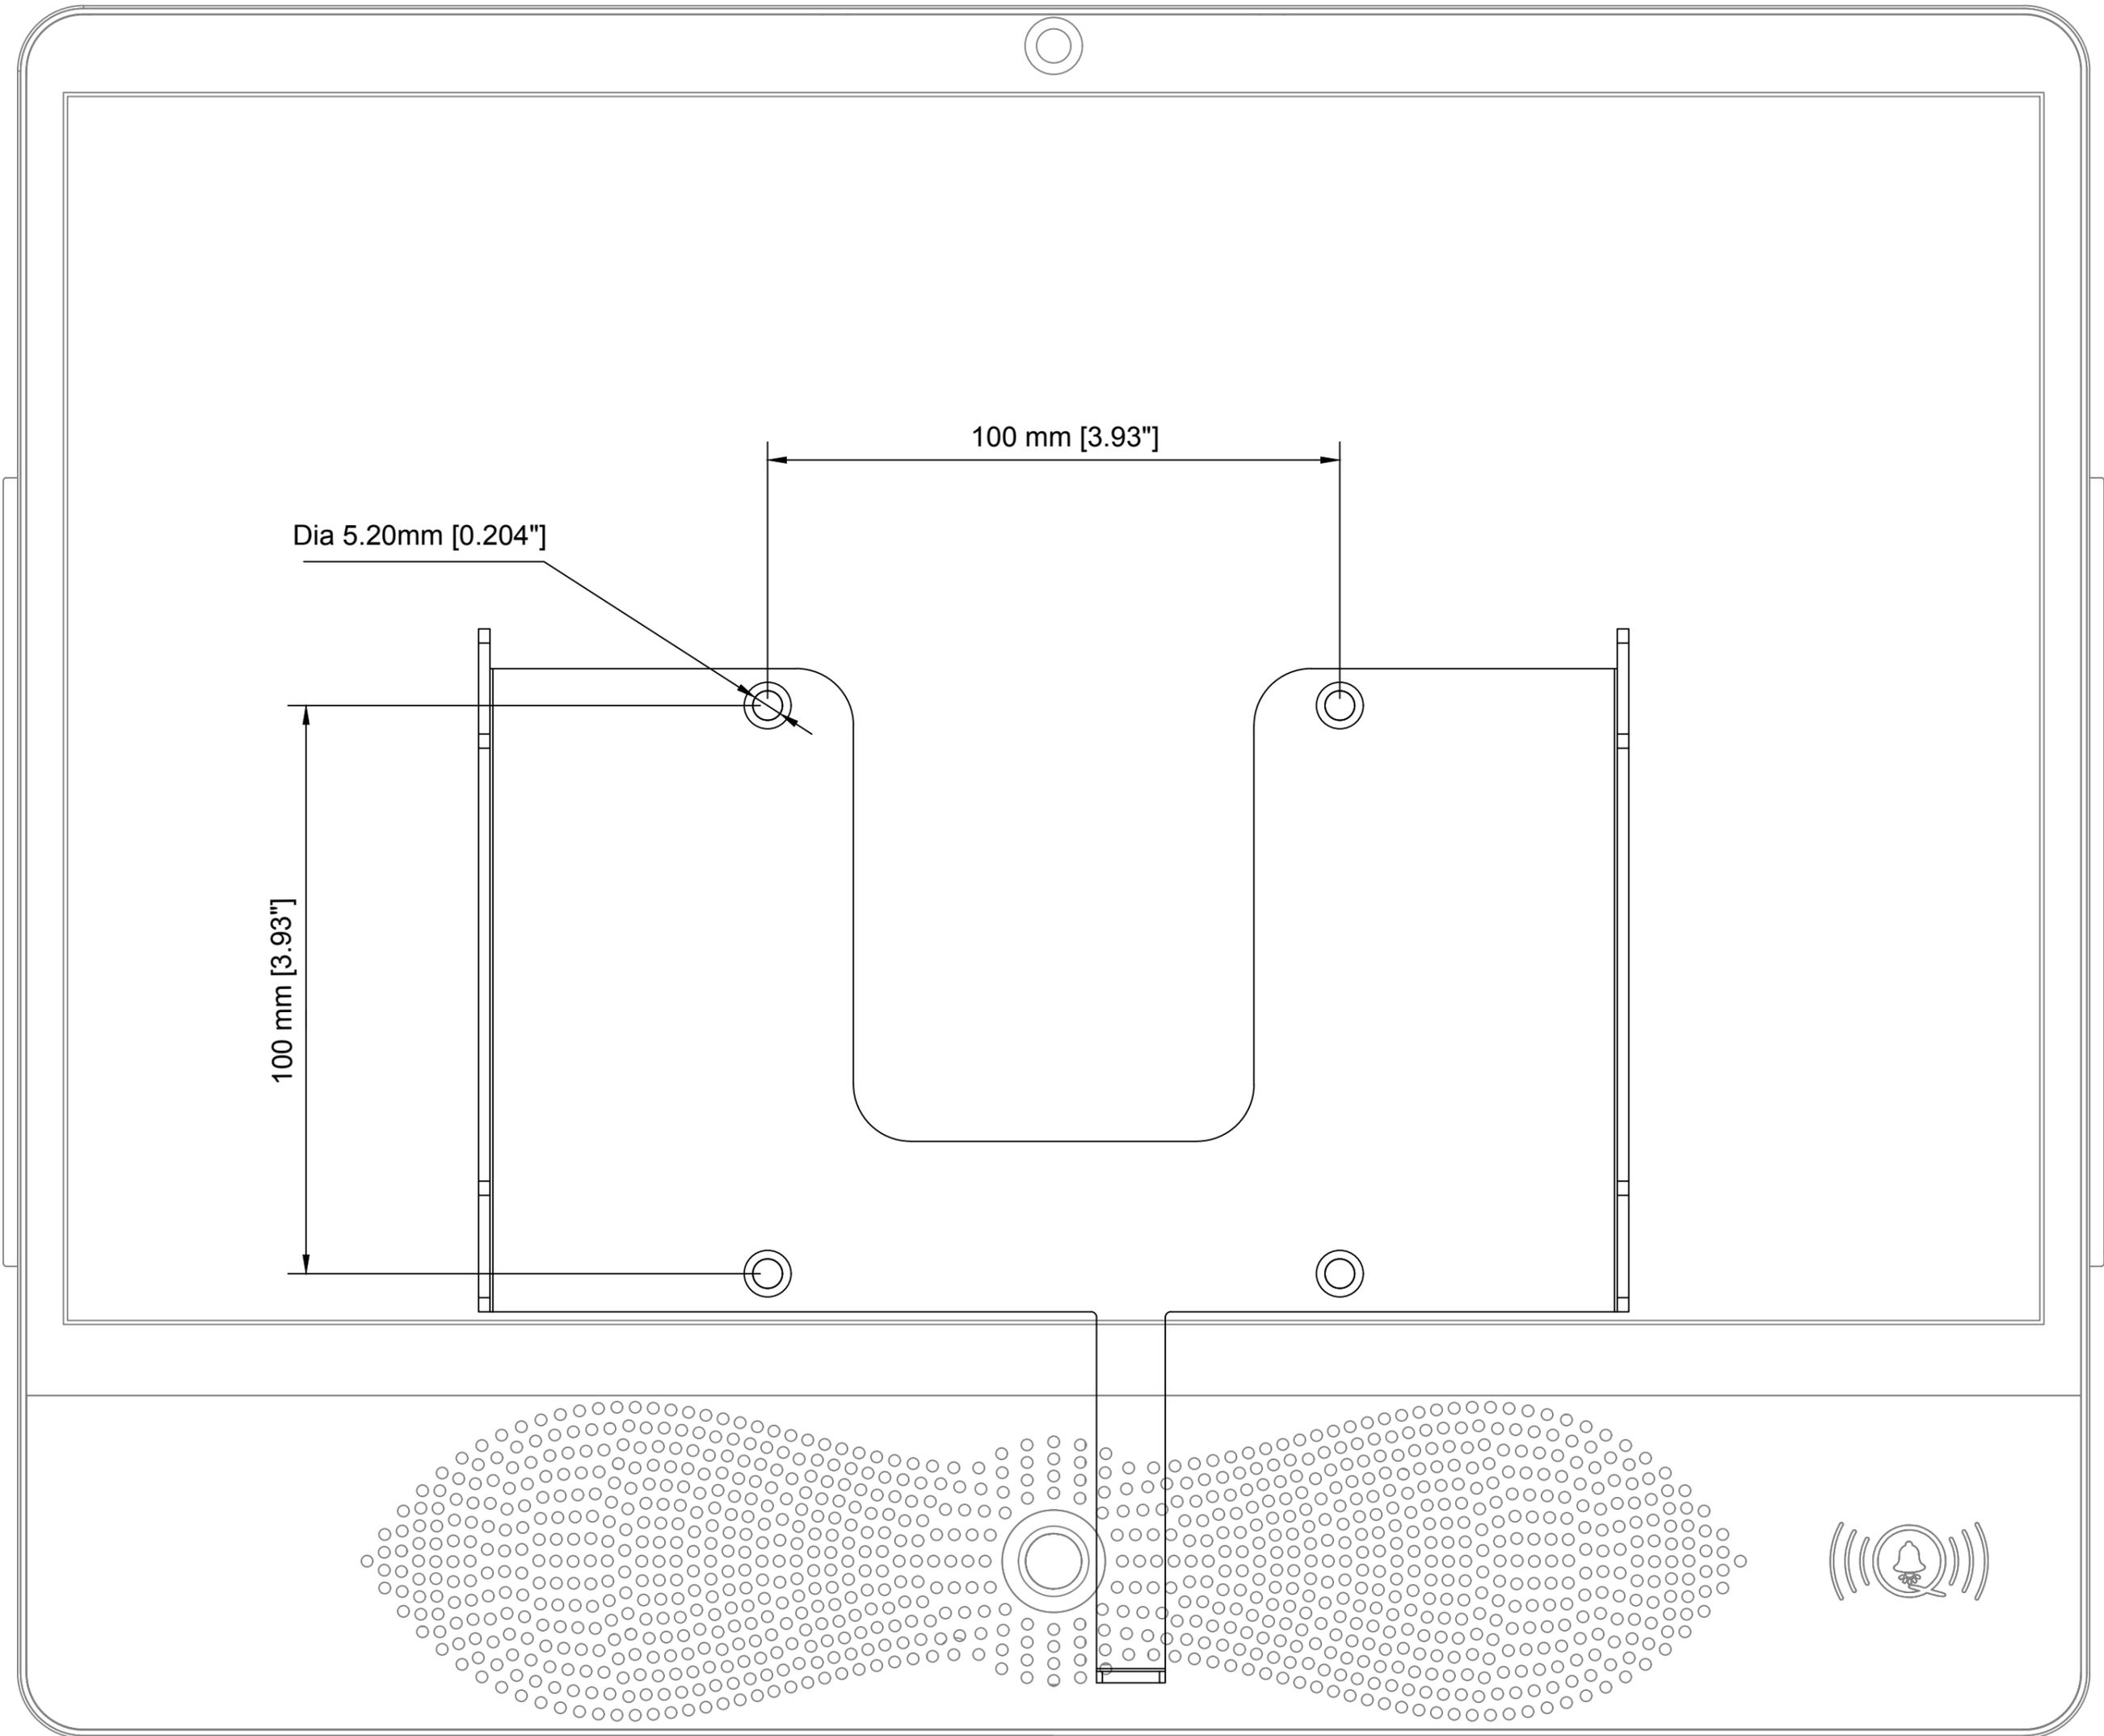

Thread the PoE (60W) cable, and insert it into the appropriate ethernet port, ensuring a secure and stable connection. Alternatively, the device may be powered using a 12V-5A rated power supply (sold separately). Slide the device onto the mounting plate, secure at the bottom using the included screw.

#### Step 3

Once Tablet is powered on, follow the on-screen instructions for streamlined configuration. Alternatively, you can use the browser-based Quicklert Management Platform. Scan the QR code above to gain further insights.
